DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,595,872 in view of Ogg et al (2003/0027668). The '872 patent and the present invention claim golf balls comprising a core, an intermediate layer and a cover layer. The core is made from a polybutadiene and has a diameter from 1.35 to 1.64 inches. The intermediate layer is made from an ionomer blend of fifty parts of a sodium neutralized high acid methacrylic acid ionomer and fifty parts of a zinc neutralized high acid methacrylic acid. The cover layer is made from a thermosetting polyurethane, thermoplastic polyurethane, ionomer, polyether amide, polybutadiene, or any mixture thereof and has a hardness from 45 to 75. The '872 patent does not claim a surface comprising a plurality of smooth portions and lattice members. However, Ogg teaches

a golf ball comprising a surface with lattice members and smooth portions. One of ordinary skill in the art would have modified the '872 patent by including the surface pattern of Ogg for enhanced flight performance.
